

Dear FCC,

My husband and I have just been informed of an issue regarding the proposed expansion of the broadcast service "LPFM". We feel that this would interfere with broadcasting of FM stations like K-Love and would put them off the air. My husband and I have and will continue to support K-Love each month and feel that this station is very important to the communities for which they provide services. As you are aware K-Love is self supported and it would be discreminary to introduce a new broadcast service that would keep them from broadcasting. We are writting to you today to speak up for K-Love, letting you know how much we enjoy the services that they provide, we feel that it would be in the communities best interest to keep them broadcasting as usual. We feel that K-Love thru its music and talk shows, etc., show us how to live a better life, encouraging people each and every day, sharing experiences so that we all can feel we are not alone and that God does care and love us all. Have you ever listened to K-Love? If not I encourage you to tune in and decide for yourself why this station is so important to each of the communities it provides services to.
